

Cabinet Door-Face Frame Assembly Table MT-110

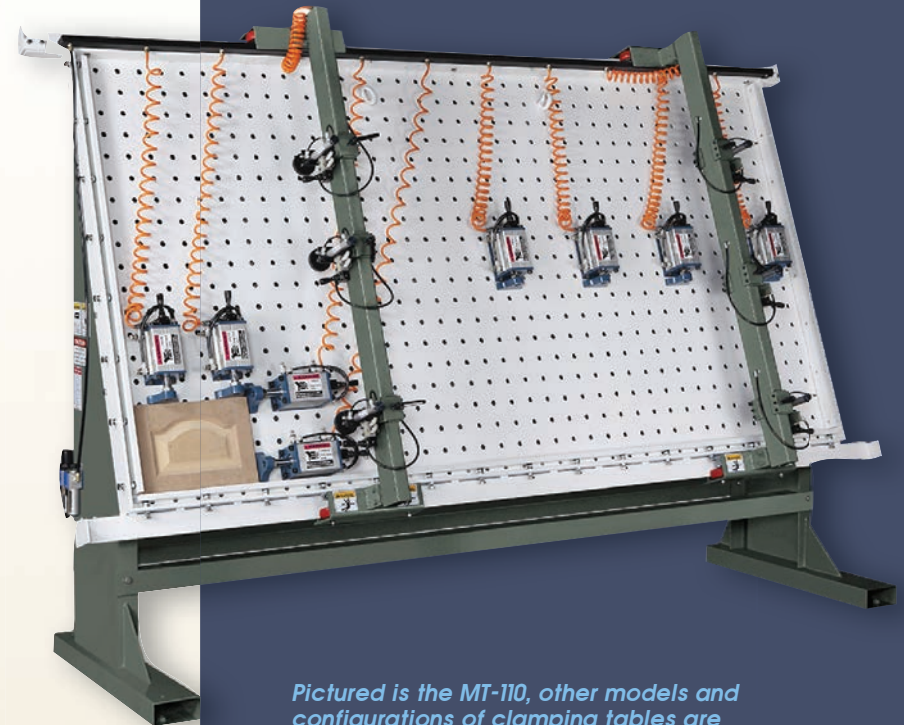

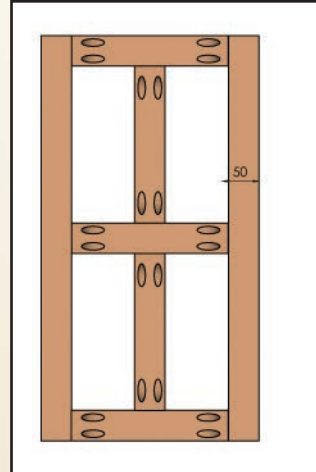

The Dotul Cabinet Door/Face Frame Assembly Table is a heavy duty assembly table that utilizes sliding arms that put downward pressure on the face frame joints. Movable side clamps can be placed in position to give side clamping pressure while the operator screws the face frames together or assembles a cabinet door.

Features and Benefits

- Heavy duty tube frame construction – Supports the sliding arms and reduces any frame movement from the clamps.
- Ergonomically angled work surface – Helps reduce operator fatigue.
- Large work area – Multiple frames or cabinet doors can be assembled using the optional 2nd clamping arm.
- Easy to move sliding clamp arms – Accurately and easily position the arms and clamps over the face frame joints.

SPECIFICATIONS

Model -	MT-110
Side cylinder -	#80*100 psi: 8PCS
Clamp cylinder -	#20*100 psi: 6PCS
Machine size -	9'9" x 4'9" x 6'9"
Shipping size -	10'9" x 3'3" x 7'3"
N.W./G.W/ -	1390/1610 Lbs

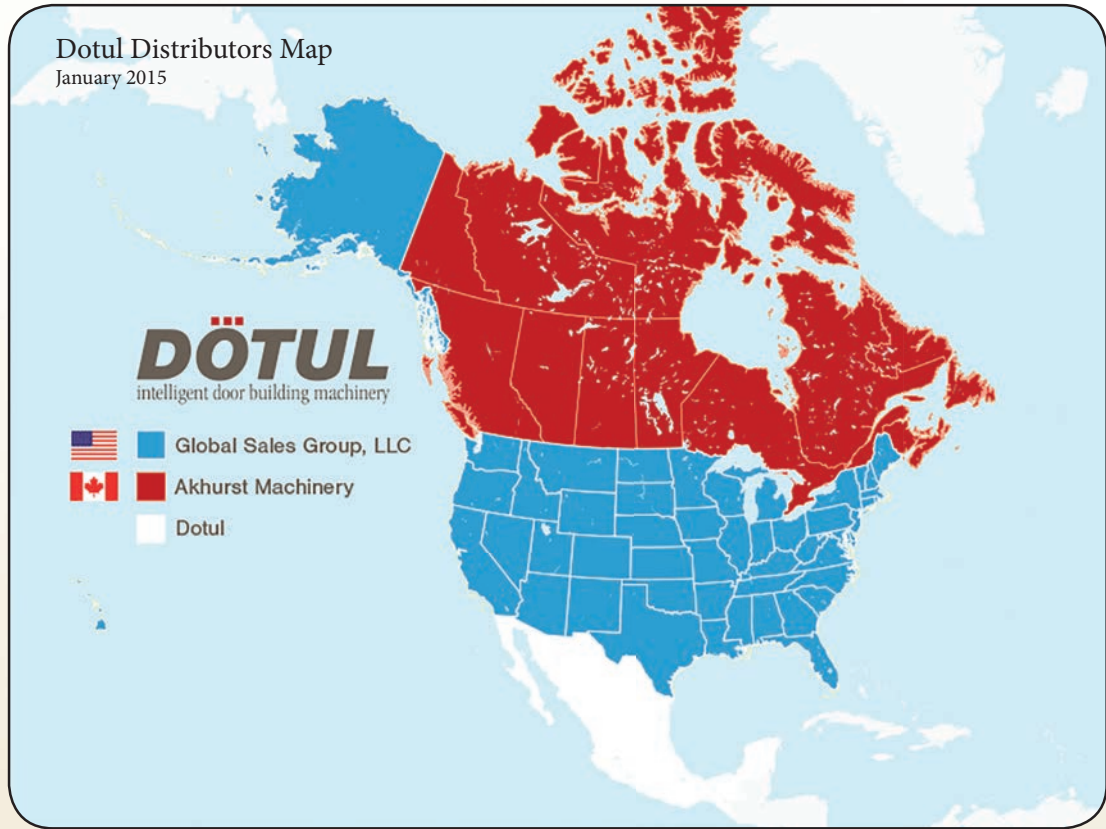

Pictured is the MT-110, other models and configurations of clamping tables are available.

Pictured is a sample face frame that can be clamped up in the MT-110 for assembly.

Manufacturer reserves the right to make changes and improvements on machinery as necessary.
